This file is maintained by the LATEX Project team. Bug reports can be opened (category tools) at https://latex-project.org/bugs.html.

## Abstract

Make the first line of all sections etc. be indented by the usual paragraph indentation. This should work with all the standard document classes.

\if@afterindent LATEX uses the switch \if@afterindent to decide whether to indent after a section heading. We just need to make sure that this is always true.
